SUMMARY

Manthan is a Civil Engineer with a Master's degree in Construction Management and over four (4) years of experience supporting large-scale infrastructure projects. Currently overseeing construction operations for airfield projects at DFW International Airport, he ensures projects meet quality standards, schedules, and regulatory requirements. Manthan specializes in project management, problem-solving, and quality assurance, with expertise in asphalt and concrete placement. He is proficient in adhering to FAA Part 139 regulations, SWPPP requirements, and FAA Advisory Circulars. Known for addressing field challenges collaboratively, he optimizes project outcomes, fosters client satisfaction, and maintains airfield operational excellence.

RELEVANT EXPERIENCE

Assistant Construction Manager, SouthWest Hardstands, DFW International Airport, TX, \$67M (August 2025 – Present)

- Reviewed 3-week lookahead schedules in Primavera P6 against the baseline and reported variances to maintain project milestones.
- Inspected existing utilities and instructed contractor foremen and field utility engineers on using dig sheets to ensure constant awareness of underground lines during excavation.
- Conducted daily Task Hazard Analyses with contractor leadership and crews; performed end-of-shift safety inspections in coordination with Airfield Operations.
- Directed contractor surveyors to confirm recycled concrete base elevations before P-501 concrete placement, ensuring grade accuracy per design plans.
- Validated survey control points alongside the survey team to ensure layout precision and field readiness.
- Audited contractor SOV quantities using Bluebeam and field verification; with taking a reference of QA/QC daily reports.
- Oversaw slipform paving activities, confirming stationing, paving rate, finishing practices, and curing application met FAA AC 150/5370-10H requirements and project specifications.
- Coordinated with Environmental, Water, and Terminal departments to resolve interdependencies and maintain seamless project execution.
- Evaluated RFIs and submittals for compliance with design and specifications; facilitated communication with the Engineer of Record for timely resolution.
- Prepared Daily Construction Reports detailing site conditions, weather effects, installed quantities, and safety observations.
- Maintained the project schedule to track progress, analyze critical delays, and align activities with the master schedule.
- Supported project risk assessments and ensured ongoing compliance with FAA safety and regulatory standards.

Construction Representative, SouthWest End Around Taxiway-1B, DFW International Airport, TX, \$260M (December 2024 – Present)

- Monitored contractor activities in alignment with the Baseline Schedule and 3-Week Look Ahead schedules, collaborating with the Construction Manager to address on-site discrepancies and close out open issue notices related to quality.
- Ensured that work was being executed as per the plans, meeting all acceptance criteria and fulfilling project specification requirements.
- Supported the Senior Construction Manager in preparing/ closing out punch lists and coordinating contractor actions while collaborating with key stakeholders, including Environmental, ETAM, and Commissioning departments.
- Collaborated with the Environmental Affairs Division (EAD) on environmental field issues, including Stormwater Pollution Prevention Plan (SWPPP) compliance. Ensured timely communication of environmental aspects and impacts.
- Coordinated the setup of long-term and rolling closures for Runway/Taxiway, maintaining seamless communication with operations throughout the process.
- Verified and signed off on quantity sheets by performing takeoffs to confirm accurate quantities submitted by contractors.
- Completed daily Part 139 filings, ensuring all safety and security protocols were met and maintained.
- Made sure strict adherence to FAA Form 7460 boom-clearance submittals and related Oracle Unifier documentation to initiate special inspections in full alignment with 14 CFR Part 77 requirements.

YEARS OF EXPERIENCE

- 3 Years in Aviation Construction
 - DFW International airport
 - Tucson International airport

Construction Representative, Runway 17R-35L Rehabilitation Program, DFW International Airport, TX, \$245M (January 2024 – May 2025)

- Created the PWL spreadsheet for P-501 and P-401, and calculated the final dollar amount for every lot and subplot across the entire 17R program.
- Coordinated with Operations to address issues/deficiencies like runway/taxiway edge light repairs, improper sodding, pavement markings, and directed contractors to resolve them as a top priority.
- Prepared a punch list spreadsheet after stakeholder walkthroughs, documenting deficiencies with photos and exact locations; distributed records to CM, PM, and contractors for corrective action.
- Verified quality by addressing non-conforming work and coordinating with Quality Control (QC) teams.
- Oversaw SWPPP compliance in collaboration with Environmental Affairs Division, and reviewed contractor activities with schedules to ensure alignment with timelines.
- Used Unifier software for project documentation and reviewed construction documents per QA plans.

Construction Representative, Skylink Column Drains, DFW International Airport, TX, \$1.5M (February 2024 – September 2024)

- Verified quantities for contractor payments and assisted with monthly invoice submissions.
- Conducted inspections to ensure work aligned with project plans and specifications.
- Assisted the Project Manager in preparing change orders, Scope of Work documents, and Records of Negotiation.
- Participated in scheduling meetings, providing proactive solutions to mitigate delays.

Airport Civil Engineer for Airfield Safety Enhancements Program (ASE), Tucson International Airport, AZ, \$450M (July 2023 – January 2024)

End Around Taxiway Construction

- Conducted inspections of construction activities, updated conformed drawings, and maintained a drawing log for revisions and change orders.
- Led weekly quantity reconciliation and prepared agendas for construction closeout meetings.
- Ensured quality by inspecting pavements, subgrades, and airfield lighting.

Taxiway C Construction

- Drafted and documented weekly meeting agendas and minutes, reviewed RFIs and submittals, and updated PWL spreadsheets for asphalt tonnage.
- Verified as-built records and daily construction activities using PMWeb software..

Project Engineer, Shreepad Group, India, \$18M, (January 2020 – July 2021)

- Assisted in executing commercial project from buy-out to close-out, ensuring adherence to budget, schedule, and quality objectives.
- Ensured project compliance by thoroughly reviewing project plans and specifications, and diligently evaluating shop drawings and submittals to guarantee adherence to project objectives and requirements.
- Coordinated with Contractor regarding project schedules, drafted scopes of work, estimated bids, prepared change orders, and ensured overall safety compliance.
- Increased productivity by reducing delays like material, inspection, equipment shortages & drawing errors.
- Responsible for estimating and bid procedures, contract management, overall safety procedures, project budget and change order preparation, and administration of construction contracts with clients.

Project Engineering Intern, Shreepad Group, India, \$18M, (July 2019 – December 2019)

- Estimated quantities and costs based on the contract drawings and schedule of values.
- Determined strategies to reduce risks associated with future projects by supervising work activities.

Academic Projects

Role of Geotechnical Investigation in Seismic Hazard Assessment

- Designed an efficient model for deep excavation and studied the soil formations before building any essential structures which are conducted by the Institute of Seismological Research.

Construction Project Contracts, Strategies, and Negotiations

- Conducted workflow, and updated diagram to derive requirements for ongoing project enhancements.
- Integrated contract lifecycle management by creating a centralized and uniform record.
